INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

| Applicant's or agent's file reference P410283WO | FOR FURTHER ACTION | See Form PCT/IPEA/416 | | | |
|--|---|--|--|--|--|
| International application No. PCT/GB2004/003846 | International filing date (day/mor | nth/year) Priority date (day/month/year) 09.09.2003 | | | |
| International Patent Classification (IPC) or national classification and IPC F15D1/12, F16L1/12, E02D5/60, B63B39/00, B63B21/66, B63B21/50, E21B17/01 | | | | | |
| Applicant CRP GROUP LIMITED ET AL | | | | | |
| This report is the International preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. | | | | | |
| 2. This REPORT consists of a total | of 5 sheets, including this cov | er sheet. | | | |
| 3. This report is also accompanied I | by ANNEXES, comprising: | | | | |
| a. 🛛 sent to the applicant and t | o the International Bureau) a to | otal of 1 sheets, as follows: | | | |
| sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions). | | | | | |
| sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box. | | | | | |
| sequence listing and/or ta | Bureau only) a total of (indicate bles related thereto, in comput a Listing (see Section 802 of the | e type and number of electronic carrier(s)) , containing a ter readable form only, as indicated in the Supplemental se Administrative Instructions). | | | |
| 4. This report contains indications r | elating to the following items: | | | | |
| ☐ Box No. I Basis of the op | inion | | | | |
| ☐ Box No. II Priority | | | | | |
| ☐ Box No. III Non-establishn | nent of opinion with regard to r | novelty, inventive step and industrial applicability | | | |
| ☐ Box No. IV Lack of unity o | invention | | | | |
| ⊠ Box No. V Reasoned stat applicability; ci | ement under Article 35(2) with tations and explanations suppo | regard to novelty, inventive step or industrial orting such statement | | | |
| ☐ Box No. VI Certain docum | ents cited | | | | |
| | s in the international application | | | | |
| Box No. VIII Certain observations on the international application | | | | | |
| Date of submission of the demand | | of completion of this report | | | |
| 02.03.2005 | | 10.2005 | | | |
| Name and mailing address of the international | | norized Officer | | | |
| preliminary examining authority: European Patent Office - Git D-10958 Berlin | schiner Str. 103 | ightholme-Albanis | | | |

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2004/003846

| | Box No. I Basis of the repor | | |
|----|--|--|--|
| 1. | With regard to the language, this report is based on the international application in the language in which it filed, unless otherwise indicated under this item. | | |
| | This report is based on tran which is the language of a t | slations from the original language into the following language , ranslation furnished for the purposes of: | |
| | D publication of the internal | der Rules 12.3 and 23.1(b)) ational application (under Rule 12.4) examination (under Rules 55.2 and/or 55.3) | |
| | With regard to the elements* of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report): | | |
| | | | |
| | Description, Pages | | |
| | 1-9 | as originally filed | |
| | Claims, Pages | | |
| | 11 | as originally filed | |
| | 10 | received on 02.03.2005 with letter of 01.03.2005 | |
| | | | |
| | Drawings, Sheets | | |
| | 1/2, 2/2 | as originally filed | |
| | ☐ a sequence listing and/or a | ny related table(s) - see Supplemental Box Relating to Sequence Listing | |
| 3. | ☐ The amendments have res | ulted in the cancellation of: | |
| | ☐ the description, pages☐ the claims, Nos. | | |
| | ☐ the drawings, sheets/fig | | |
| | ☐ the sequence listing (sp☐ any table(s) related to s | | |
| | , , , | | |
| 4. | ☐ This report has been estable had not been made, since they Supplemental Box (Rule 70.2(c)) | lished as if (some of) the amendments annexed to this report and listed below have been considered to go beyond the disclosure as filed, as indicated in the)). | |
| | ☐ the description, pages☐ the claims, Nos. | | |
| | the drawings, sheets/fig | s | |
| | ☐ the sequence listing (sp☐ any table(s) related to s | | |
| | | tomo or all of these sheets may be marked "superseded." | |

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2004/003846

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Yes: Claims

1-11

No: Claims

Inventive step (IS)

Yes: Claims

1-11

No: Claims

Industrial applicability (IA)

Yes: Claims

1-11

No: Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

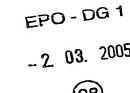

- The following documents are referred to in this communication:D1: US 6 401 646 B1 (EDFELDT MICHAEL P ET AL) 11 June 2002 (2002-06-11)
- 2 INDEPENDENT CLAIM 1
- 2.1 Document D1 discloses a vortex-induced-vibration suppression cladding section from which the subject matter of claim 1 differs in that the cladding section comprises a rotational moulding with an outer layer incorporating anti-fouling material and an inner structural layer.
- 2.2 The subject-matter of claim 1 is therefore new (Article 33(2) PCT).
- 2.3 The problem to be solved by the present invention may therefore be regarded as to provide a vortex-induced-vibration suppression cladding section which is straightforward and economical to manufacture and install, and by which marine fouling is inhibited.
- 2.4 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:
- 2.5 From the cited prior art it is not obvious to the skilled person to provide, in combination, the cladding section of D1 with two layers, with anti-fouling material localised in the outer layer, and to manufacture the section by rotational moulding. This has the advantage of reduced manufacturing expense.
- 2.6 Claims 2 6 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

- 3 INDEPENDENT CLAIM 7
- 3.1 By a reasoning similar to that for claim 1, the subject-matter of claim 7 satisfies the criteria of Article 33(1) PCT since the subject-matter is new (Article 33(2) PCT) and involves an inventive step (Article 33(3) PCT).
- 3.2 Claims 8 and 9 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

Re Item VIII.

Claims 10 and 11 contain references to the description and the drawings. According to Rule 6.2(a) PCT, claims should not contain such references except where absolutely necessary, which is not the case here.

10 CLAIMS

- 1. A vortex induced vibration suppression cladding section for mounting upon an elongate underwater member, the section comprising a plastics rotational moulding shaped to provide a tubular portion for receiving the member, the tubular portion being split along its length and being deformable to permit the member to be introduced into the tubular portion, the cladding section comprising at its exterior at least one feature shaped to suppress vortex induced vibration, and the cladding comprising an outer layer incorporating anti-fouling material and an inner structural layer.
- 2. A cladding section as claimed in claim 1 which is a rotational moulding.
- 3. A cladding section as claimed in claim 1 or claim 2 wherein the vortex induced vibration suppression feature is a hollow projection.
- 4. A cladding section as claimed in claim 3 wherein the feature is an elongate hollow strake.
- 5. A cladding section as claimed in any preceding claim which comprises polyethylene.
- 6. A cladding section as claimed in any preceding claim, end portions of
